**Pending Contract with the Teletype Corporation**

1. In company with qualified attorneys of the Patent Department of the Army, an examination has been made of the various patents on file in the name of the Teletype Corporation with regard to preformed facsimile. The results of this investigation have resolved in general agreement that the position held by Teletype in this field is strong enough patent-wise for us to accept their contention that the device we have requested them to manufacture is but a modification of devices which they have adequately patented previously and that it would be proper to negotiate the contract for the services required on the terms outlined in the Teletype Corporation's recent letter. It is therefore the recommendation of the Engineering Section that such a procedure be followed.
